#### **DETAILED ACTION**

# Response to Amendment

1. Applicant's amendment was received on 6/9/06 and has been entered and made of record. Currently, claims 1-9 and 11 are pending.

### Response to Arguments

2. Applicant's arguments, see pages 6-11, filed 6/9/06, with respect to the rejection of claims 1-9 and 11 have been fully considered and are persuasive. The rejection of claims 1-9 and 11 has been withdrawn. Particularly, Endo fails to disclose storing client-associated last received time and data associating the client to the last received time.

## Allowable Subject Matter

- 3. Claims 1-9 and 11 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

It would not have been obvious to one of ordinary skill in the art at the time the invention was made to combine a packet monitor that monitors a packet, and updates and stores client-associated last received time by the client and data associating the

client to the last received time, the client-associated last received time being the last time when the printer receives the packet for using the printer from the client, wherein the client is located on a network and is one of a plurality of clients, with the other limitations set forth in the claims.

The closest prior art, previously noted as Endo et al. (US 6493100), discloses a packet monitor that monitors a packet, and updates and stores client-associated printing start and end times and the time interval between the last job and the present time, all of the times being associated with only one client being connected via a parallel cable to the printer. Endo further discloses a time setting unit that sets the length of time to switch to the power save mode based on the printer usage. However, Endo fails to disclose a packet monitor that monitors a packet, and updates and stores client-associated last received time by the client and data associating the client to the last received time, the client-associated last received time being the last time when the printer receives the packet for using the printer from the client, wherein the client is located on a network and is one of a plurality of clients.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
